قاعدة الوحدة 24

The infinitive

المختصر المفيد من القاعدة:

تعلمنا متى نستخدم to و متى لا نستخدمها:

1. إذا بدي اسأل ليش؟؟! بستخدم to مثلاً: I study to pass

2. بعد الصفات مثل (easy,difficult,important)+to+verb مثلاً: it's easy to learn

3. بعد أفعال معينة (want,try,decide)+to+verb مثلاً: I want to learn

4. يوجد بعض الأفعال لا نستخدم بعدها to مثلاً: (can,must,may,let,make) أمثلة: I can run

- This make me laugh

ملاحظة: هذا الشرح مختصر فقط لفهم فكرة القاعدة و يفضل الرجوع الى القاعدة الأساسية و سنكتبها الان كما وردت في الكتاب:

The infinitive with to is used in the following ways:

-To express purpose:

We use symbolic languages **to communicate** instructions to the computer.

(= in order to communicate)

Not: ... for to communicate.

-After adjectives:

BASIC was widely used in the past because it was **easy to learn**.

Machine code is too **difficult to write**. (= not easy enough to write)

-After certain verbs:

e.g: afford, demand, plan, agree, expect, promise, appear, hope, refuse, arrange, learn, try, decide, manage

A lot of companies are now **trying to develop** voice applications for web access

-After the object of certain verbs:

e.g: advise, encourage, allow, expect, tell, ask, invite, want, enable, order, warn

HTML **allows us to describe** how information will be displayed on web pages

The bare infinitive (without to) is used in the following ways:

-After modal verbs (e.g. can, could, may, might, will, would, must, should):

Unfortunately, computers **can't understand** spoken English.

High-level languages **must be** translated into machine code.

-After the object with the verbs **make** and **let**:

Programs **make computers perform** specific tasks.

make sentences using these prompts:

1. not easy / write instructions in COBOL.
2. expensive / set up a data-processing area.
3. advisable / test the programs under different conditions.
4. unusual / write a program that works correctly the first time it's tested.
5. important / use a good debugger to fix errors.
6. easy / learn Visual BASIC.

ANSWERS:

1. It's not easy to write instructions in COBOL.
2. it's expensive to set up a data-processing area.
