ملحق اللغة الانجليزية 4

عمل طلابي

RB Informatcs; 14/07/2026

English 4

يرجى دراسة المحاضرات اولا فهذا الملحق يحتوي على تمارين داعمة للمحاضرات فقط

ملاحظة : اول ثلاث صفحات من الملحق هي الصفحتان 88 و 91 من الكتاب و هما مطلوبتان

HELP box:

- The prefixes **e-** and **cyber-**
- The **e-** prefix means electronic, and we add it to activities that take place on computers or online, for example **e-business / e-commerce** – business conducted over the Internet.
- Other examples include: **e-card ...e-learning...e-zine...e-voting...e-signature...e-assessment...e-cash...e-book...e-pal**
There are often spelling variations, with or without a hyphen, so always check your dictionary.
- The **cyber-** prefix comes from cybernetics, and we use it to describe things related to computer networks, for example **cybercafé** – an internet café. Other examples include: **cybercrime...cyberculture...cyberslacker...cyberspace**

الفكرة من الصندوق المساعد اعلاه هي المقارنة بين البادتين الملونتين باللون الازرق بالصندوق لاكمال الفراغات في التمرين التالي

■ أولا: البادئة e

الحرف اختصار لكلمة electronic

الكلمة electronic تدل على ان الشيء يتم الكترونيا او عبر الانترنت

■ أمثلة:

e-mail = بريد الكتروني

e-book = كتاب الكتروني

e-learning = التعلم الالكتروني

e-commer = التجارة الالكترونية

e-card = بطاقة الكترونية

e-voting = التصويت الالكتروني

e-signature = التوقيع الالكتروني

e-assessment = التقييم الالكتروني

e-cash = النقود الالكترونية

e-pal = صديق عبر الانترنت

■ ثانياً: البادئة cyber تستخدم كلمة cyber لكل ما يتعلق بالشبكات أو العالم الرقمي.

■ أمثلة:

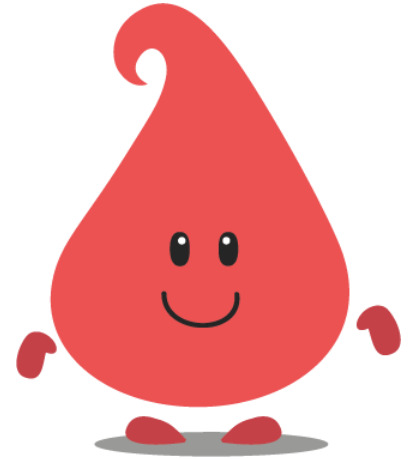

cybercafé = مقهى انترنت

cybercrime = الجرائم الإلكترونية

cyberslacker موظف يضيع وقت العمل على الإنترنت

cyberculture = الثقافة الرقمية

cyberspace = الفضاء الإلكتروني

■ Look at the HELP box and then complete these sentences:

- 1. A _____ is an employee who uses his company's internet connection during work hours to chat with friends, play games, etc.
- 2. An _____ is a postcard sent via the Internet.
- 3. An _____ is a small magazine or newsletter published online.
- 4. In a _____ you can use computers with internet access for a fee.
- 5. Examples of _____ include internet fraud, digital piracy, theft of confidential information, etc.
- 6. In the future, all elections will be carried out using _____.
- 7. You can now sign legal documents online using an _____.
- 8. _____ will revolutionise the way we take exams.
- 9. _____ can be used on some websites instead of real money to make purchases. It reduces the risk of fraud

- 10. An _____ is like the paper version, but in digital form.

The answers:

- | | | |
|-----------------|------------------|-------------|
| 1. cyberslacker | 2. e-card | 3. e-zine |
| 4. cybercafe | 5. cybercrime. | 6. e-voting |
| 7. e-signature | 8. e-assessment. | 9. e-cash |
| 10. e-book | | |

A Netiquette

هاد التمرين بكل بساطة بيحكى عن اتيكيت التعامل مع الناس

- 1. Netiquette, or net etiquette, is a general code of behaviour for communicating online.

1. True
2. False

- 2. TYPING IN CAPITAL LETTERS looks like:

1. the message is very important.
2. you're shouting.

- 3. What should you avoid doing in chat rooms

1. Being respectful
2. Giving out personal or financial information

- 4. Spamming means

1. posting stupid comments in chat rooms.
2. posting unsolicited advertising messages.

- 5. Before asking questions in a chat room or posting messages to forums, you should always

1. read the FAQs (Frequently Asked Questions).

- 6. Avoid flame wars. Flames are

1. angry responses or offensive comments
2. people who break the rules of netiquette.

- 7. Keep messages short and to the point, and check spelling and grammar

1. True
2. False

The answers:

1. True

2. you're shouting
3. Giving out personal or financial information
4. Posting unsolicited advertising message
5. read the FAQs (Frequently Asked Questions)
6. angry responses or offensive comments
7. True

ملحق الوحدة 19 (اسئلة عن النص)

choose the correct answer:

- 1. What are small files placed on your hard drive by web servers to recognize your PC called?
A) Digital certificates B) Cookies C) Firewalls D) Worms
- 2. Which protocol provides secure online transactions?
A) HTML B) PGP C) SSL (Secure Sockets Layer) D) XML
- 3. "Pretty Good Privacy" (PGP) is a system designed to send:
A) Disguised malware B) Emails privately using encryption C) Unsecured web data D) Predefined tags
- 4. What does decryption do?
A) It copies data into intermediary computers.
B) It converts encrypted data back into its original form.
C) It deletes cookies automatically.
D) It allows users to create custom tags.
- 5. A program that spreads through email attachments and replicates itself to everyone in an address book is a:
A) Trojan horse B) Spyware C) Worm D) Adware
- 6. Software that allows pop-ups (advertisements that suddenly appear on your screen) is called:
A) Freeware B) Adware C) Antivirus D) Digital certificate
- 7. In the computer industry, crackers are also known as:
A) White hats B) Softwares C) Black hats or darkside hackers D) Firewalls
- 8. Hackers only break into computer systems to steal information.
A) True B) False
- 9. Mozilla Firefox displays a lock when the website is secure.
A) True B) False
- 10. Digital certificates act like digital identification cards for users and web servers.

A) True B) False

- 11. As your email travels across the Net, it is copied temporarily onto many computers in between.

A) True B) False

- 12. Firewalls are used to change data into a secret code.

A) True B) False

- 13. A Trojan horse is malware disguised as a useful program.

A) True B) False

- 14. Originally, all computer enthusiasts and skilled programmers were known as hackers.

A) True B) False

The Answers:

1.B	2.C	3.B	4.B	5.C	6.B
7.C	8.B	9.A(True)	10.A(True)	11.A(True)	12.B(False)
13.A(True)	14.A(True)				

ملحق الوحدة 24 (اسئلة عن النص)

1- Which of these statements is correct?

- A) A computer can understand the natural language.
- B) The machine code is easy to write.
- C) The machine code consists of 1s and 0s.
- D) A computer only can understand English.

2- Which programming language uses abbreviations such as "ADD"?

- A) Machine code
- B) Assembly language
- C) High-level language
- D) Mark-up language

3- Which term has the same meaning as "machine code"?

- A) Binary Code
- B) Assembly Language
- C) High-Level Language

4- What does the assembler do?

- A) It translates high-level language into machine code.
- B) It translates assembly languages into machine code.

C) It executes the programs directly without translation.

5- Why do we use symbolic languages?

- A) Because computers can understand them directly.
- B) Because machine code is too difficult to write.
- C) Because they don't need translation.

6- Why do developers design high-level languages?

- A) To make programming easier for humans.
- B) To replace machine code directly.
- C) To eliminate the need for translation.

7- COBOL is an abbreviation for?

- A) Common Object-Oriented Language
- B) Common Object- Business Language
- C) Computer Binary Language.
- D) None of the above.

8- BASIC is known for being:

- A) Difficult to learn.
- B) Easy to learn and widely used on microcomputers.
- C) Used for business.
- D) A Markup Language.

9- Which language was designed for scientific applications?

- A) C++
- B) FORTRAN
- C) Visual Basic
- D) HTML

10- COBOL was developed in?

- A) 1950
- B) 1959
- C) 1968
- D) 1975

11- Which language was developed first?

- A) COBOL
- B) BASIC
- C) FORTRAN
- D) C++

12- In the phrase "scientific research", the word "scientific" is a:

- A) Noun
- B) Verb
- C) Adverb
- D) Adjective

13- The word "commercial" is a?

- A) Noun
- B) Verb
- C) Adverb
- D) Adjective

14- What is the main difference between the compiler and the interpreter?

- A) The compiler translates all the program at once while the interpreter does it line by line.
- B) Both translate programs line by line.
- C) A compiler translates high-level language while an interpreter translates low-level language.

15- What are the features of Java?

- A) It is used for business applications.
- C) It can run on different platforms and run on the web.
- D) It doesn't need translation.

16- What do markup languages use to format text?

- A) Commands
- B) Tags
- C) Binary numbers

17- What is the difference between HTML and XML?

- A) HTML allows custom tags, XML doesn't.
- B) HTML uses predefined tags, while XML allows custom tags.
- C) There is no difference.

18- What is a "flowchart"?

- A) Program instructions written in a particular computer language.
- B) A special program which converts the source program into machine code.
- C) A diagram representing the successive logical steps of the program.
- D) The basic instructions understood by computers consisting of 1s and 0s.

19- What is "source code"?

- A) Program instructions written in a particular computer language.
- B) The techniques of detecting and correcting errors (or bugs).
- C) A diagram representing the successive logical steps of the program.
- D) The basic instructions understood by computers.

20- What is a "compiler"?

- A) A diagram representing the successive logical steps of the program.
- B) A special program which converts the source program into machine code.
- C) The techniques of detecting and correcting errors in programs.
- D) Program instructions written in a particular computer language.

21- What is "machine code"?

- A) Program instructions written in a particular computer language.
- B) The techniques of detecting and correcting errors (or bugs) in programs.
- C) A special program which converts the source program into machine code.
- D) The basic instructions understood by computers; it consists of 1s and 0s (binary code).

22- What is "debugging"?

- A) A special program which converts the source program into machine code.
- B) The techniques of detecting and correcting errors (or bugs) which may occur in programs.
- C) Program instructions written in a particular computer language.
- D) A diagram representing the successive logical steps of the program.

The answers:

1.C	2.B	3.A	4.B	5.B	6.A
7.D	8.B	9.B	10.B	11.C	12.D
13.D	14.A	15.C	16.B	17.B	18.C
19.A	20.B	21.D	22.B		

That's all we've got for this subject, and we've officially done!
